网片

WIRE MESH PANEL

网片种类:

不锈钢网片、黑铁丝网片、镀锌铁丝网片、涂塑网片、带框网片

优点:

焊接牢固, 网孔均匀, 网面平整, 耐腐蚀、强度大、防护能力强

本产品广泛用于工业、农业、养殖、建筑、交通运输、采矿等方面

Assortments Available:

Welded Stainless Steel Wire Mesh Panels/Welded Black Wire Mesh Panels/Galvanized Welded Mesh Panels (Hot Dipped Galvanized and Electric Galvanized)/PVC Coated Welded Mesh Panel

Features:

Welding firmly, Mesh uniform, smooth surface, Corrosion resisting, Protection ability

The Product is widely used in **industry, agriculture, cultivation, building, transportation, mining industry** etc.

刀片刺网

RAZOR WIRE

刀片刺网是一种新型防护网。
该产品具有吓阻效果好，美观，施工便利，经济实用等优异特点。

主要用于园林公寓，机关单位，监狱，哨所，边防等围禁防护。
刀片刺网由锐利尖角镀锌铁板或不锈钢薄板做刀片，高张力钢丝做芯线组合而成的阻绝器材。

由于刺网造形独特不易触摸，因而能达到极好的防护隔离效果。

Razor wire is a new kind of security fence which is used widely in many countries. When you need to get serious about security, razor wire is the answer; it is relatively inexpensive, but viciously effective. Razor wire around the perimeter is enough to deter any would be vandal, robber or saboteur. Razor wire is made from a corrosion resistant galvanized steel cutting ribbon wrapped around a core of galvanized spring steel wire. It's impossible to cut without highly specialized tools, and even then it's a slow, dangerous job. Razor wire is a long lasting and very effective barrier technology, known and trusted by security professionals.

电焊网

WELDED WIRE MESH

不锈钢电焊网选用316, 316L, 304, 302等不锈钢材质生产各种网孔超长, 超宽等特殊规格的电焊网, 宽度可达2.1米, 最大丝径5.0mm。本产品主要适用于高档围栏, 超市货架, 室内外装饰, 食品筐, 高级皮毛, 动物养殖, 具有强度高, 不生锈, 抗腐蚀, 耐酸, 耐碱, 耐高温等优点。

镀锌电焊网系选用优质铁丝, 通过精密的自动化机械技术加工制成, 网面平整, 结构坚固, 整体性强, 即使局部承受压力, 也不会发生松动现象, 电焊网成型后进行热镀锌, 耐腐蚀性好, 具有一般铁丝网不具备的优点。

涂塑电焊网采用先电镀锌和先热镀锌铁丝焊接后, 再用PVC或PE粉末经高温, 自动身材线浸涂而成。主要用于超市货架, 室内外装饰, 家禽养殖, 花木围栏, 室外用于别墅, 小区的围墙隔离。具有颜色鲜明, 美观大方, 防腐, 防锈, 不褪色, 抗紫外线等优点。

Stainless steel welded wire mesh adopts 316, 316L, 304, 302 and other stainless steel material. We can also produce ultra-long, ultra-width and other special standard welded wire mesh. The width can reach to 2.1 m, the biggest wire diameter is 5.0mm, the product is fit for top quality fence netting, storage racks in supermarkets, interior and exterior decoration, food basket, breeding of animals, etc. It has high strength rustless, corrosion resistant, acid-resisting, alkali-resisting, high temperature and other excellent feature.

Galvanized iron welded wire mesh is the most economic one among our welded wire mesh products and finds the most popular uses. Galvanized welded iron wire mesh is divided into electro galvanized welded wire mesh and hot-dip galvanized welded wire mesh according to treatment.

Plastic-coated electric welded meshes, it adopts electric galvanized before or hot dipped wire then the PVC and PE powder go through the high temperature they are made with the automatic production line. They are mainly used for the product frame in the super market decorating inside and outside domestic fowl cultivation, garden fence the outside it is used in villa, separating the enclosure in the area. It has the most of bright color, beautiful and generous anti-corrosive, anti-rust no fade and so on.

刺绳

BARBED WIRE

材料: 优质低碳钢铁 (镀锌, 涂塑, 喷塑) PVC丝

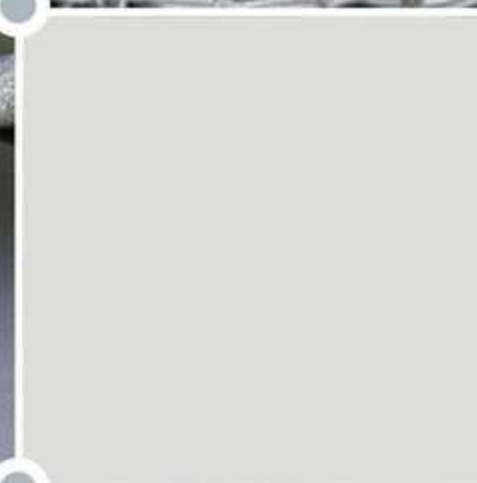

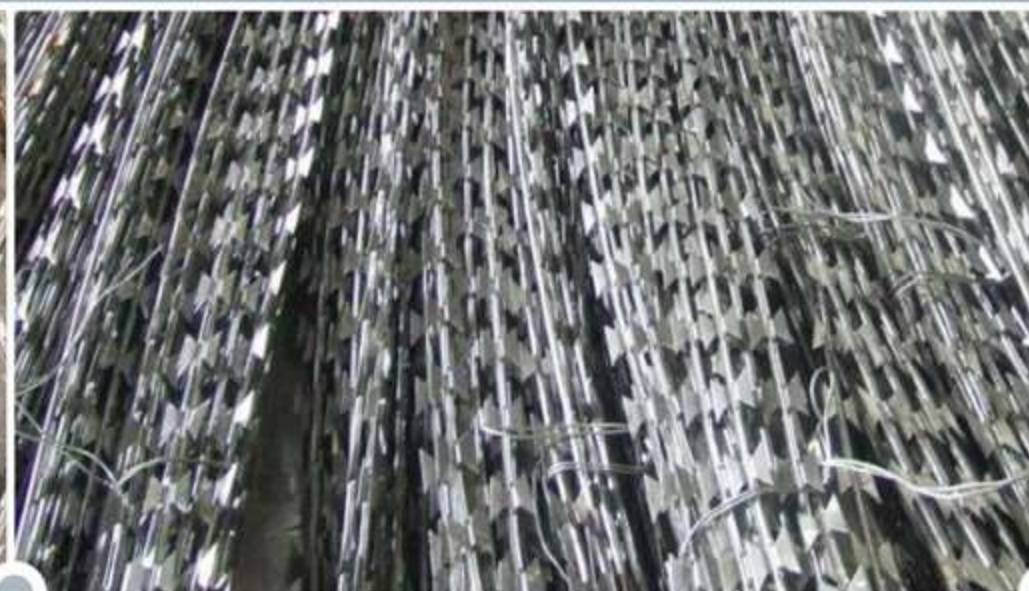

Material: high quality low carbon steel wire, PVC wire

颜色: 蓝色, 绿色, 黄色等

Color: Blue, green, yellow and other colors available

用途: 用于草场边界, 铁路, 高速公路等的隔离防护

Applications: Used as protection of grass farm, railway, highway etc

FT-46

轧花网

CRIMPED MESH

材料:

黑钢丝, 白钢丝, 铅丝, 不锈钢丝等

编织及特点:

先轧后编, 结构坚固

用途:

多用于煤山, 矿山, 建筑等行业

Material:

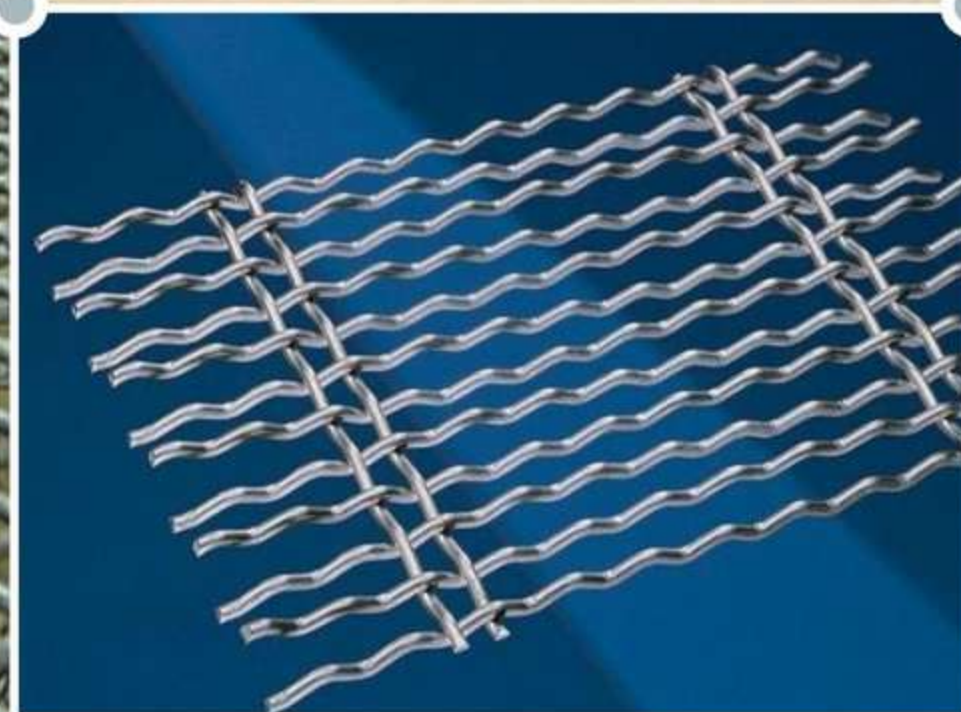

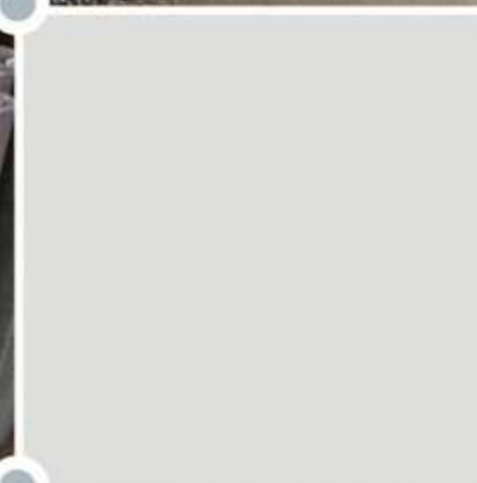

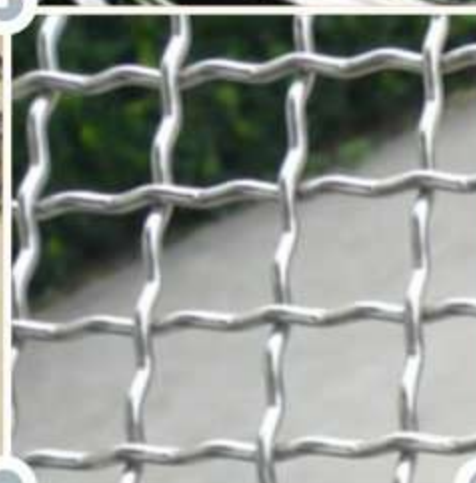

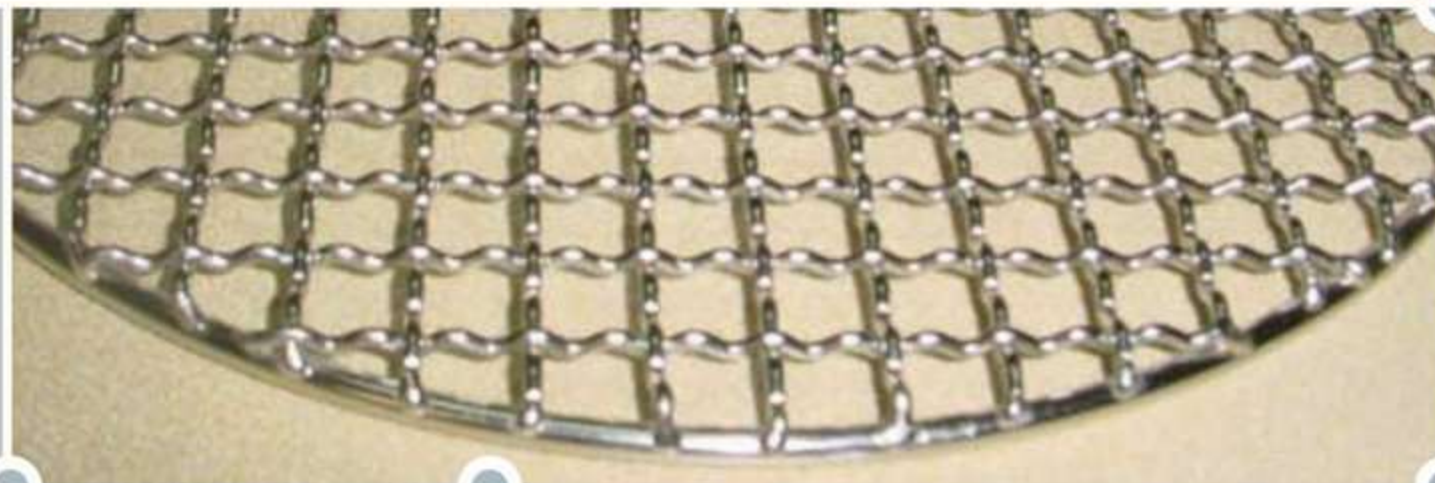

Black steel wire, white steel wire, lead wire, stainless steel wire

Weaving and characteristic:

Crimped before woven, those goods have the stable structure

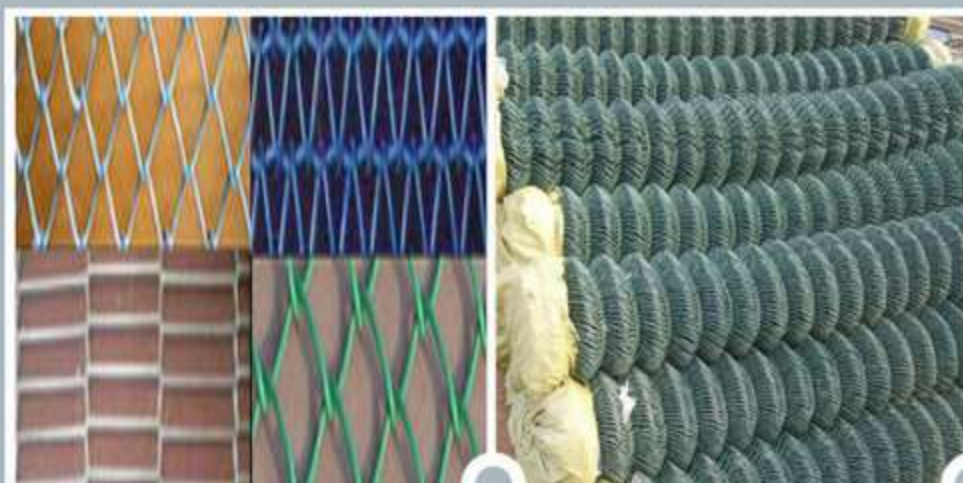

Applications:

Mainly used in coal and mine, building etc

勾花网

CHAINLINKWIREMESH

材料: PVC 涂塑丝

编织: 钩编而成, 编织简洁, 安装拼接灵活, 美观实用

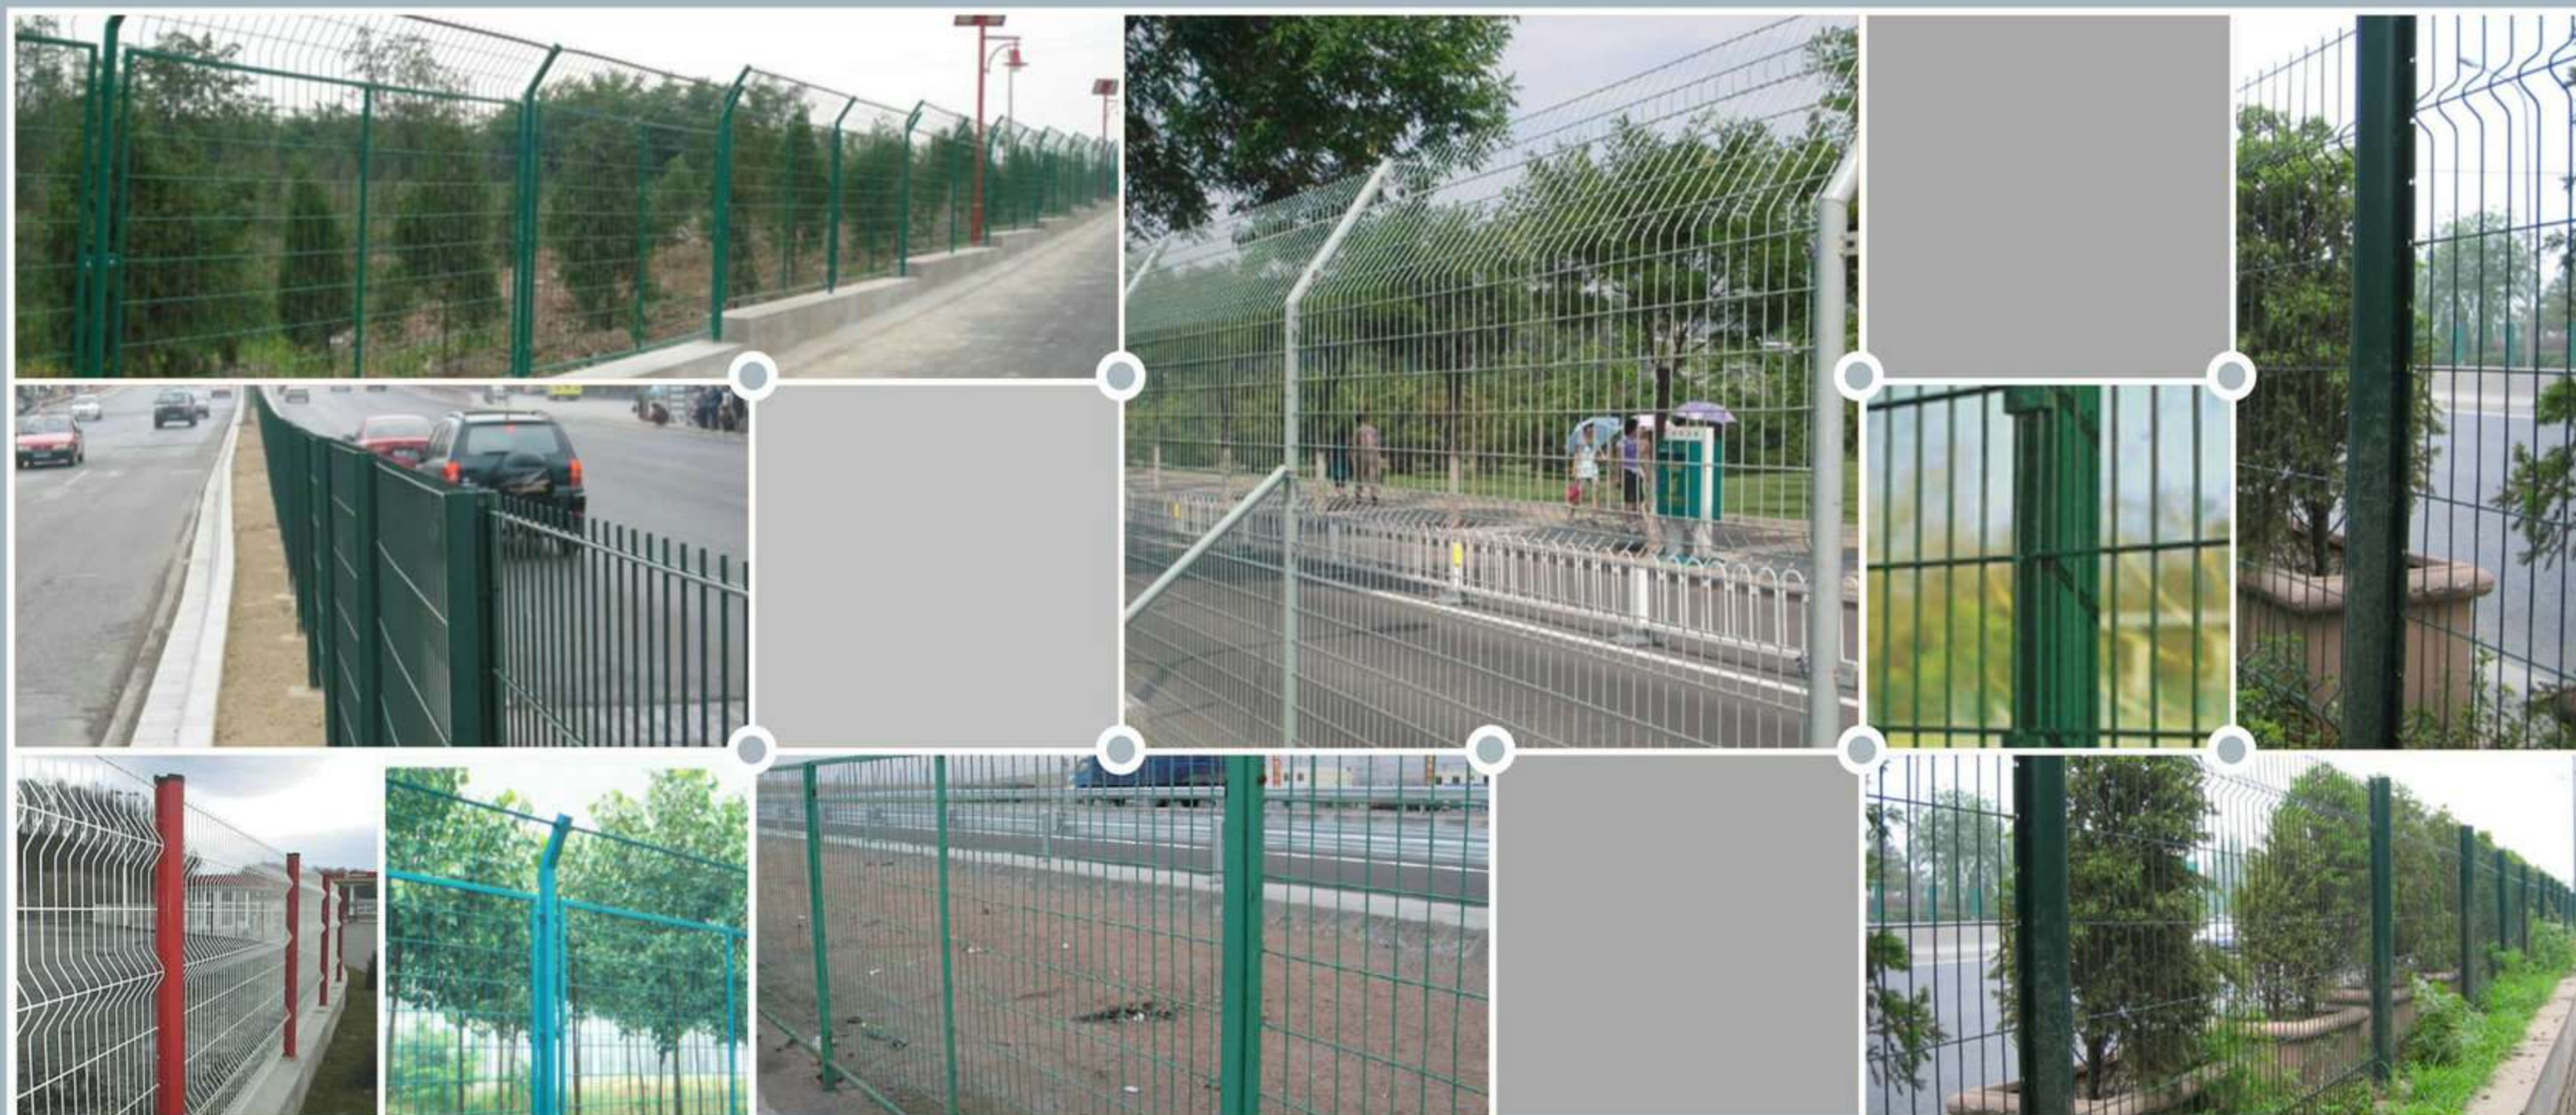

用途: 该产品主要用于饲养家禽及动物的围栏, 机械设备的防护, 高速公路护栏, 体育场所围网, 马路绿化带防护等

Material: PVC coated wire

Weaving and application: Chain link weaving

Applications:

Chain link fence is used in the fields of architecture, playing-field, greening fence, waterways, residence, safeguard, etc.

公路护栏网

ROAD SIDE FENCE

公路护栏网结构简单，美观实用，运输方便，安装快捷，能够适应各种地形。

产品优点：

1. 结构简单，美观实用
2. 便于运输，安装快捷
3. 经济实用，适应力强

Road side fence is simple in structure, beautiful and practical, easy for transport and install, and can be suitable for most of topography.

Features:

1. Simple in structure, beautiful and practical
2. Easy for transport and install
3. Economic cost and suitable for most of topography

铁路护栏网

RAILWAY FENCE

铁路护栏网的主要特点是结构坚固，网身高大，防攀爬，颜色艳丽，美观大方。目前已经开始了铁路全面提速的时代，所以，铁路的封闭性也有了更高的要求，而框架护栏网正是符合这种要求的最佳选择。因此，它一出现就被国内的铁路部门所接受。

铁路防护网的产品优点：

1. 强度高，整体稳定性好
2. 彩色塑层具有良好的抗腐蚀和装饰效果
3. 网围界整体和谐，美观

铁路防护网的主要市场：

铁路封闭，高速公路护栏，开发区围界等

The main characteristics of the railway fence: firm frame, tall shape, climbing-prevent, bright color, generous appearance. Nowadays, the speedup request higher closure for the railway, therefore, the frame fence is the best choice to meet this requirement, it has been accepted by railway interests when its appearance

Features:

1. High intensity, and good overall stability
2. Color plastic layer has good corrosion resistance and adornment effect
3. Overall of the fence is harmonious, beautiful

The main market of railway fence:

Railway closed, guardrail of Highway, Development zone enclosure, etc.

机场护栏网

AIRPORT FENCE

机场护栏网的主要特点是网身高大，防攀爬能力强，抗冲击，表面采用双层防腐处理，可达到10年的超长寿命。一经推出，就得到了各大型机场的高度认可。

材料：

低碳钢丝，铝镁合金丝

用途：

用于公路，铁路，飞机场，住宅小区，港口码头，花园，饲养，畜牧等护栏防护。

The main feature of airport fence is high and wide mesh sheet, good anti-climbing and impact resistance ability. Double corrosion resistance for surface, so the service life can be more than 10 years, it is very popular in many major airports.

Material:

Mild steel wire, Aluminum magnesium alloy wire

Applications:

Mainly used for barrier and security around the airport and anti-climbing projects.
For example: Road, Railway, Airport, Ports, Garden, etc.

体育场（运动场）围栏 SPORT FENCE

产品优点：

产品色彩鲜亮，抗老化，耐腐蚀，规格齐全，网面平整，强力张紧，不易受外力撞击变形。灵活性强，可根据现场要求，随时调整造型和尺寸。

主要用途：

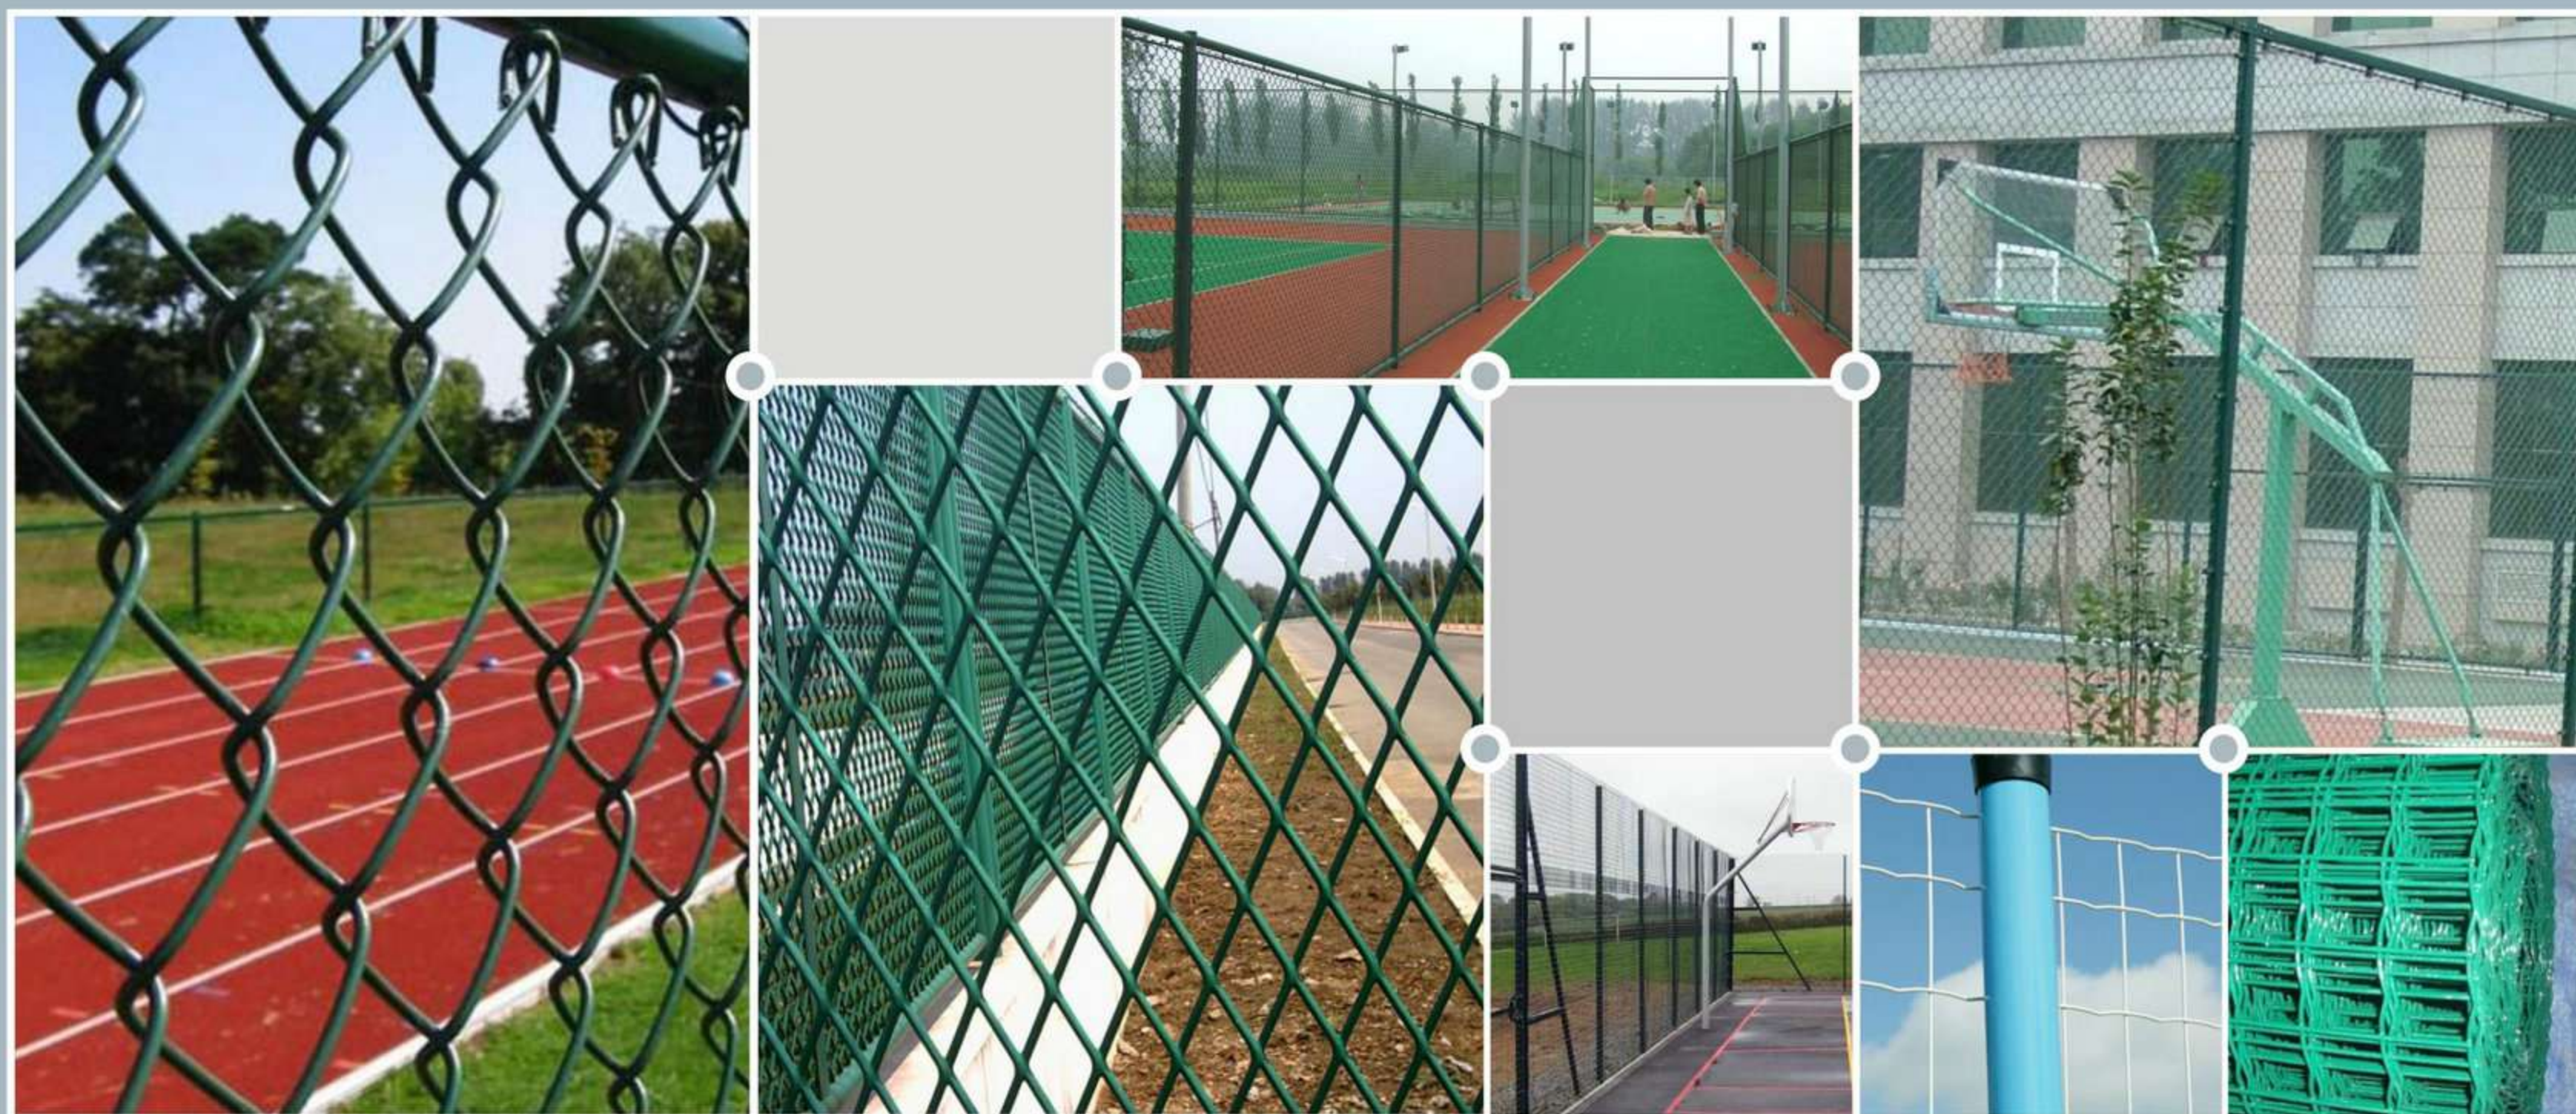

主要用于对质量要求较高的网球场，篮球场地，综合场地围网。

Features:

The product has bright color, full sizes and flat surface and good strength, it has the property of aging resistance, corrosion resistance and good flexibility.

Applications:

It is suitable for tennis playground, basketball sport and other fencing.

住宅小区、公园护栏网 HOUSING DISTRICT / GARDEN FENCE

产品优点:

产品色彩鲜亮, 抗老化, 耐腐蚀, 规格齐全, 网面平整, 强力张紧, 不易受外力撞击变形。整体感觉好, 视野开阔, 通风好, 钢度好, 结构造型美观耐用, 颜色多样, 既有美观作用, 又起护栏作用。

主要用途:

主要用于厂区, 小区, 市政隔离, 机场, 车站, 服务区, 景区, 场区, 保税区, 露天仓储场, 港口。

Features:

The products has bright color, full size and flat surface and good strength, it has property of aging resistance, corrosion resistance and good flexibility. The wholeness of the fence is perfect with high air permeability. Firm and nice structure. This fence is working as fencing as well as decoration.

Applications:

Application: Factory zone, housing district, separation for municipal, airport, station, landscape area, outdoor storage, and ports.

欧式护栏 EURO FENCE

产品特点:

防腐性能好, 抗老化, 美观大方, 安装简便快捷。

主要用途:

工业, 农业, 市政, 交通灯行业的围栏, 装饰, 防护等设施。

材质: 优质钢板

制造工序: 冲压成型, 热镀, 喷塑, PVC

Features:

This kind of fencing product offers good corrosion resistance, age resistance, and beautiful view, simple and easy installation.

Applications:

Euro fence is used in fencing, decoration and security facilities for industries, agriculture, city construction and transport.

Material: Super quality steel plate

Processing:

Punched into different models, surface treatment can be hot dipped zinc plating. Plastic spray coating and plastic coating.

荷兰网是一种外形高大的焊网，上部有保护性尖刺，网线为镀锌钢丝，加PVC涂塑处理，在保护美观同时，保证了最大程度的坚固和耐用

Holland wire mesh is a welded wire mesh with high and big shape, the top has the point stab, the net line is made of galvanized steel wire. It is processing with PVC, not only protecting the beauty but also assuring the fastness and enduring in the biggest degree.

荷兰网 HOLLAND WIRE MESH

采用优质盘条作为原材料，经由镀锌，PVC热缩粉末浸塑保护的焊接式卷网或片网，具有日久抗腐蚀，抗紫外线等问题。

网片和立柱主要用特制的塑料卡子或高强度不锈钢丝卡子连接，具有安装方便，牢固等特点。

Using high quality wire rod as raw material, after galvanized or PVC coating, the welded panel or rolled fence can resist the corrosion and sunshine.

The panels and the posts are connected by the special plastic clip or high strength stainless steel wire clip. They are easy to be installed and very firm structure.

临时护栏网 TEMPORARY FENCE

产品特点及主要用途：

临时护栏网具有安装方便，不破坏周边环境，通透性好，便于管理等特点。最大隔离高度可达8米，通常用于市场分隔，车间工区分离，临时仓库等

Features and applications:

The temporary fence can be installed easily and the surrounding environment will be not damaged with high permeability. Application: mall and workshop separation, temporary storehouse.

钢板网/防眩网

ANTI-GLARE WIRE MESH FENCE

钢板网广泛用于公路，铁路护栏网，桥梁防抛网，开发区围墙，具有美观大方，坚固耐用等特点。

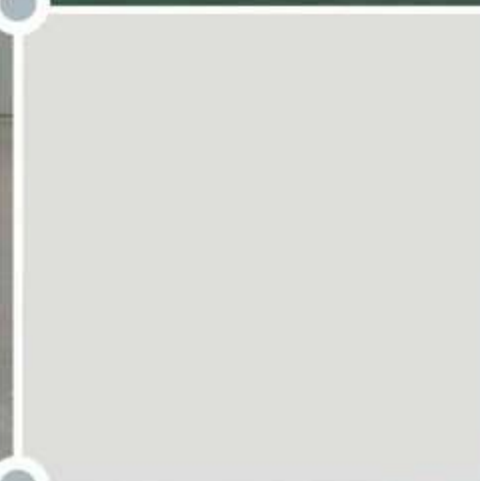

防眩网主要用于高速公路夜间行驶车辆的灯光防护，美观大方，易保养，颜色艳丽，是美化公路环境工程的首选产品。

Expanded wire mesh is widely used in highway fence and railway fence, bridge anti-throwing wire mesh, and development zone fence; it is elegant in appearance, firm and durable in structure.

Anti-glare fence: Mainly used for prevent vehicles' lighting when driving at night. With elegant appearance, easy maintenance, bright colors, it is first choice for the engineering of beautifying the environment of highways.

车间围栏

WORKSHOP FENCE

防爬栏网

ANTI-CLIMB

高防护网又称358围栏或者防爬网

这个系统是广泛用于可防御的空间是至关重要的,在全世界范围内使用在不同的应用程序。

High security fencing is also called 358 fences or anti climb fence
this system is extensively used when defensible space is paramount, used throughout the world in varying applications.

防爬网是最难穿越的, 它可以提供一个优秀的防止攀爬和刺穿系统。

It is highly regarded as the most difficult fence to penetrate,
providing an excellent defense against climbing and cut through.

POWER SAVING
